Predicting Personas Using Mechanic Frequencies and Game State Traces

Game Mechanic:

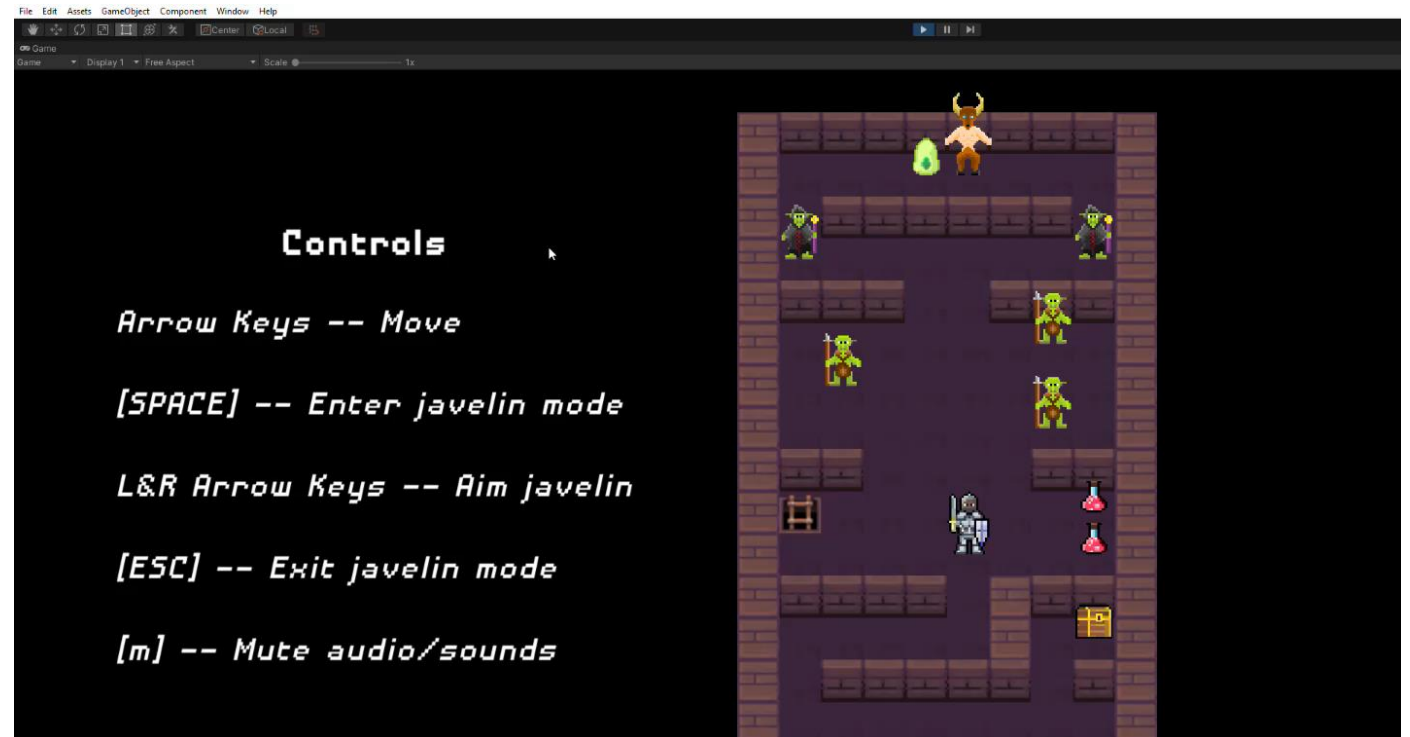

Any event in the game that involves game entities and changes the game's state.

Mechanic Frequency

“The number of times a mechanic is used within a single session/level”

Minidungeons 2

- 2D, Rogue-like Dungeon Crawler
- Win: Go to the exit
- Lose: 0 HP

- Treasure Collector
- Monster Killer

Procedural Personas

- Agents that can mimic playstyle behaviors
- Best-first search algorithms with utility rewards

Labeling with Action-Agreement Ratios (AAR)

- Using procedural personas
- Measure % of similarity
- Cumulate % over every move
